DETAILED ACTION

Claims 56-101 are pending in the application.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

1. Claims 57, 62, 64, 66, 80, 91-93, 100 and 101 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The following reasons apply:

- a) Claim 57 is vague and indefinite in that it is not known what is meant by the moiety $\text{-NH-C}_1\text{-C}_4$ alkyl M in the definition of the substituents on the naphthyl of Ar.
- b) Claim 62 recites the limitation "the additive" in the first line of the claim. There is insufficient antecedent basis for this limitation in the claim.
- c) Claim 64 recites the limitation "the additive" in the first line of the claim. There is insufficient antecedent basis for this limitation in the claim.
- d) Claim 66 recites the limitation "the additive" in the first line of the claim. There is insufficient antecedent basis for this limitation in the claim.
- e) Claims 64 and 66 are substantial duplicates of claim 62 which are each dependent upon claim 61.
- f) Claim 80 is vague and indefinite in that it is dependent upon canceled claim 8.

Art Unit: 1624

- g) Claims 91-93 are vague and indefinite in that it is dependent upon canceled claim 1.
- h) Claims 100 and 101 are vague and indefinite in that it is not known what is meant by "The compound" where the claims in which they are dependent on are not compound claims.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

- 2. Claims 56-101 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 40-54 of U.S. Patent No. 6,713,475. Although the conflicting claims are not identical, they are not patentably distinct from each other because the compounds of the instant invention are embraced

by the compositions and method of use of the compounds of formula (I) and (II) as claimed herein wherein the pharmaceutical compositions are solids.
